# BACK TO PERSISTENCE

- We approached 436 councils. Of the 409 who were responsible for Public Health Funerals, we had full responses from 300 ( all the data requested, for all the years)
- The data is taken from those 300.
- Many councils publish the data online now. But not in the form I wanted it! I spent a lot of time with a calculator!
- It took a year to gather the data.
- And another few months to crunch it

# SO WHAT DID IT SHOW?

## 'Paupers' funerals' cost councils £1.7m

# STATS, STATS, STATS & PERCENTAGES.

- North West has the most funerals – followed by London
- The South East saw the biggest increase in numbers of PH funerals – 32% more.
- Biggest rise in costs in the South West – 63%
- Birmingham did 245 PH funerals in 2014.

# WHAT HAPPENED NEXT?

- Government Select Committee Inquiry
- BBC Data contributed to their findings
- Are we now looking at an overhaul of the funeral industry and the Social Fund, and could our data have helped push that forward – I like to think so!
